

Dating App

General Features

Login

The user will be prompted to the login page. The user has an option to “Remember Me” that allows the user to still be login to the site. The session data will only expire once the user does not open visit the site for 30 days. The session data will be refreshed if the user accesses the site.

Logout

The user will log out his/her account on the site. In addition, the remember me option will be cut short and the session data will be deleted.

Register

The user can register a new account in the site. The following details are required to register an account:

- Username and Password
- Email Address
- Short Description
- Personal Details
 - Name
 - Gender
 - Birthday
 - Religion
- Address/Location
- Personality
 - Likes and Dislikes
 - Favorites (e.g. Name of Movies)
- Gender Preferences
- At least 3 Photos or Selfies

User Features

Edit Account

The user can update his or her personal details through this page. The user

can edit any field except for his or her email address and username. The user can also upload and delete photos.

Delete Account

The user can opt to delete his/her account if the user will not use the site anymore. The user may or may not state his or her reason for leaving the site. If the account has been dormant for 12 months, the site will automatically delete the account.

Match a Partner

This feature is the highlight of the app, allowing users to match themselves with other users based on certain factors, which depend on personal details, personality, and location of both the users. Users can also filter by age, gender, preferences, etc.

When a user is matched with multiple users then the user will see the partners' name, age, description and various photos. The user can also view other details of the partner. The user can accept or decline the matched user.

If the user accepts a partner, the user will be prompted to the chat system in order for them to communicate with each other. The user will then send a message to the matched partner to introduce him/herself which the other party can either respond or decline.

Declined users will not be shown to the person anymore in his/her searches.

Unmatch Partner

The user has the ability to remove a partner from his or her matched list. Unmatched partner will not be matched with the user. The app will also ask the reason for unmatching the partner.

Chat System

Once a user has been matched to another user, both users will now be able to chat with one another. Users can send messages, photos, and emojis to one another. Users can schedule dates in the chat system. Messages will stay on the site unless the user wants to delete them.

Flag/Report System

Users who have concerns with other users may use this system to report said users of abuse and bad behaviour. For minor offenses, the first flag warrants a warning. The second flag warrants a one-week-suspension, requiring the user to email the staff regarding his or her offense in order to lift the suspension. The third flag results in a ban from the community. Major offenses immediately result in a ban from the community. Banned members of the community are deleted and no longer allowed to login to the app. All criminal acts are major offenses.

Admin Features

The administrator is the manager of the site and the activities that occur within it. There is only one system administrator.

Delete and Blacklist User

The administrator can delete and blacklist a user when the user obtains three offenses against other users, or when a user has not used his or her account for 12 months.

Suspend User

The administrator can suspend a user depending on the number of offenses he or she has committed.

Manage User Reviews

The admin has the privilege to view and decide what to do with user reviews. Offensive or inappropriate reviews may be deleted by the admin.

Manage User Reports

The admin has the privilege to read user reports. Users may be deleted by the admin depending on the severity of the report.

General

Good user experience. Visitor can easily navigate without help, all information are easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application
